TOP 10 USES FOR CONCRETE PIGMENT

1. Integrally-color an indoor or outdoor concrete slab.
2. Create rich, solid color for your concrete countertop with concrete pigment. Black is our most popular color.
3. Add color to overlay for a brand new concrete surface. Over 100 colors to choose from, pre-measured for each box of overlay. No hassle!
4. Don't paint and save money! Color stucco with Concrete Pigment! Vivid colors, easy maintenance!
5. Choose the perfect color for Do-It-Yourself grout. Mix and apply!
6. Spruce up your brick home, fireplace mantel or re-paint your stone walls with colored mortar.
7. Concrete pigment is perfect for cultured and cast stones. Just mix and pour.
8. Making pavers? Our pigments will give outdoor concrete the enduring color your customers are hoping for.
9. Does your restoration project call for colored plaster? We've got the pigment for you!
10. Revive your stamped outdoor concrete with DCI Tinted Concrete Sealer. Over 40 colors available to make old concrete look new again!

The colors on this chart were mixed with 94 lbs. of white Portland cement.

Direct Colors Inc. Concrete Pigments can be used to add color to concrete, stucco, plaster mortar, grout, overlay and other cementitious materials. Our dry powder pigments can be used for both large and small projects.

To achieve the colors on our color chart, calculate for any batch size on our website, www.directcolors.com/resources/project-calculators.

Direct Colors pigments are lightfast, odorless, alkali and weather resistant, UV stable, non-hazardous, chemically inert, water insoluble, providing consistent color, tested to ASTM C979.

Our pigments are available for purchase in any quantity year round. Color matching provided for some projects.
